PROFILE

I am a full-stack developer specializing in website development with experience on over 5 projects independently and in teams. Pursuing a B.Tech degree after a 3-year diploma in Computer Science, I am passionate about creating innovative development projects

PROJECTS

JobHunt   2022

It is an ONLINE JOB PORTAL. It helps the people to seek their dream job. It is done as my first project as well as mini project of diploma. It is basically a static site.
Technology Used: HTML5, CSS

WorkStream   2023-2024

It is an OFFICE MANAGEMENT SYSTEM, customly developed for specific operations, managing hierarchical positions & their function integrated within the system. This is done as my diploma final year project.
Technology used: HTML5, CSS, PHP, MySQL & JavaScript.

Learning Management System   2024- Present

It is a learning management site where it will have three parts
1. Admin
2. Student
3. Seller

Here Admin manages & track all the activities.
The Seller can create account and sell their courses.
The Student can buy the courses according to their need
Technology Used: React JS for fontend. Node JS & Express JS for backend. MongoDB as database
